

MSAD #51

Code: EB

Environmental and Safety Program

Each Principal shall be responsible for safety at his/her school. General areas of emphasis shall include accident record keeping, plant inspection, fire safety, driver and vehicle safety, school site inspection, and emergency procedures and traffic safety on school grounds relevant to students, employees and the community. The administration shall develop procedures for handling chemical hazards and pest management materials in accordance with federal and state statutes to minimize exposure risks.

Adopted: 6/26/02
